TOWN OF RICHMOND OFFICE PROJECT

November 18, 2024

Addendum #1-R1

Q1. Since there are only two cameras shown on the plans, would all-in-one cameras with on-board storage be acceptable in lieu of an NVR? And how much storage would the Town require (1 week, 2 weeks)?

A1. Provide cameras with two weeks' on-board storage.

Q2. The door access system can either be hosted on-site on a local PC or cloud based with no PC. The cloud version would require a monthly subscription, but no support required for an on-site server. If they want an on-site solution, will the town provide the PC, or should we include it?

A2. Please plan for an on-site solution and provide the PC for the system.

Q3. Both the cameras and door equipment are Ethernet and use PoE. Should we include a PoE switch to connect and power all the devices?

A3. Yes, provide the PoE switch.
