Good morning Josh. My opinion of the "high accident risk" of this intersection is just a make-work project. The "high risk" is a mistake. I've used the intersection at least once per day since 1981, seeing 1 fender bender quite a few years ago. 4-way stop signs would be the most effective way to placate the concerns.

Cochran Road Speed Tables: Susan Wells has said Pete Gosselin will only put 2 on the west end. I hope you can convince Pete that a third is needed to stop the drag race that occurred last summer between the 2 bumps. On our end at least 1/2 the vehicles I saw were exceeding 40 in either direction. A speed table near the rec path on the curve will surely reduce that activity. The addition of that table will be the difference that may save a life. Thank you for your consideration.

Regards,

Dave Prince 105 Cochran Rd.

Hi

I'm in favor of the 4-way stop. Cost effective, easily understood by all, and most safe for everyone.
