Re: Flood repair update

As of today, the following roads have been repaired:

Huntington Road; Lawrence Road; Besaw Road; Snipe Ireland Road; Stage Road; Jones Mill Road; Kenyon Road; Hillview Road; Williams Hill Road; Jericho Road; Wes White Hill Road; Durand Road; Dugway Road; Johnnie Brook Road; Hinesburg Road; Cemetery Road; Collins Mountain Road; Mountain View Drive and Bridge Street.

The following roads have finish work left to be done by the Highway Department:

Stage Road – Rock lining of ditches, Surface gravel

Snipe Ireland Road – Surface gravel, install new guardrails

Hinesburg Road – Asphalt pave over repair patch by (Pike Industries)

Besaw Road – Asphalt pave over new culvert by (Pike Industries), install new guardrails

Mountain View Drive – Asphalt patch by Town

Dugway Road – FEMA approved (contracted) mitigation streambank work from 2023 and 2024.

In addition to the finish work left I am pricing a 10-foot diameter culvert for Hillview Road to be installed by the Highway Department. Other than Hillview Road all Town Roads are back to 2 lanes with a few driveway culvert issues. We are at a point that we will be set for winter maintenance.

We are planning to install plant mix gravel on the north side of the East Main Street sidewalk to keep it functionable for the winter as well as installing asphalt berms on the south side of the East Main Street to minimize stormwater runoff into private property.
