Subject: Seeking feedback on desired format for presentation of trail plan

Hello Selectboard members,

The Andrews Community Forest Committee would like your feedback on how we should present to you our work to update and revise the ACF Trail Plan and Management Plan. We plan to show you our progress in the next couple of months in one of two forms, depending on your preference:

1. A trail plan, based on integrated feedback to date, that would eventually become an appendix of the updated and revised Management Plan but produced ahead of that document to allow for simultaneous action towards public access, or
2. An updated and revised Management Plan to include comprehensive changes, including a Trail Plan, a Wildlife Stewardship Plan, a Trail Stewardship Plan, Abenaki Land Use Acknowledgements, and integration of community feedback.

We have had some productive conversations with Tyler Macchia about the zoning steps that would follow your feedback, and we are feeling more prepared to approach that process with the hopes of getting improved public access for the community on some reasonable timeline. Please let us know what you are looking for "format-wise", along with any other thoughts or feedback. Thanks for your time.

We would also like to invite you to attend our meetings as individuals when any of you are able to or have interest.

regards,

Chase (on behalf of the ACFC)
